

Spring Offensive

by gan *Thursday, May 29 2008, 10:00am*

international / peace/war / opinion/analysis

In an unexpected strategic twist – opinion favoured an offensive during an attack on Iran -- local forces and militias throughout the Middle East and Central Asia are mobilising for a simultaneous and concerted offensive against the American invader/occupier! A coordinated, simultaneous offensive of this type would smash the hold America has on a number of nations in the region. America simply does not have the human resources to respond to such a coordinated offensive. Nor would America's few allies be willing to fight illegal wars of occupation on America's behalf!

From the Gulf States through Lebanon, Iraq to Iran and the border regions of Pakistan-Afghanistan; a Spring offensive would see the occupiers ousted from the region or forced to disproportionately respond -- an action that would necessarily involve Russia and China in a proportionate retaliatory response in support of their allies.

America would face a coordinated guerilla campaign on a number of fronts, which it clearly would be unable to sustain. The alternative option of a full-scale indiscriminate response by the U.S. would attract a nuclear strike on continental USA! However, regardless of America's action the obliteration of Israel would be a certainty!

The Zionists and neo-cons have brought America and Israel to the threshold of WWII. Their decision will determine their fate; however, we hold little hope for their respective futures -- the world is all too familiar with the belligerence and brutality that characterise these two nations!

The claims made in this report cannot be verified; nevertheless, it seems that U.S. agencies have been caught flat-footed once again. The near future will confirm the accuracy of this report, notwithstanding the feasibility of such a scenario in the present circumstances.
