

Greatest opportunity since War of Independence

by major mitchell *Friday, Jul 18 2008, 11:36pm*

international / social/political / opinion/analysis

The founding fathers shared the fear that commercial or other self-serving interests would one day hijack their new democratic Republic. [Current circumstances in the U.S. prove these fears were not unfounded]. Provisions were encoded in the Constitution and Bill of Rights to safeguard the fledgling democracy and ensure it remained free of commercially destructive, self-serving interests. The right of citizens to bear arms allowed for a ready militia or citizen's army that could march on the Capital at short notice if the need arose. The RIGHT to bear arms was NOT designed for personal defence it was designed for NATIONAL DEFENCE AGAINST AN INTERNAL ENEMY!

Times change but threats do not! Today, marching on the capital with small arms is impractical. However, other means are available to the people to effect change and dispose of destructive, criminal governments? The first, and probably most effective, is to use the enemy's own weaknesses and 'strengths' to tip it over and apply the final blow! Asian martial arts are based on this principle.

Yielding and then using the opponent's own force/strength to defeat him is the basis of all great asymmetric victories. The crucial factor is when and where to apply the minimal force required to topple a 'stronger' opponent? Would you care to take a guess? Please try and THINK -- we appreciate the U.S. media-entertainment complex is designed by the powers to diminish the critical thinking faculty, misinform and manipulate but your brain isn't dead yet!

Hint? It's the economy stupid; Bush and his criminal cohorts have destroyed the national economy in their frenzy to acquire personal wealth via their corporate arms - Halliburton etc. All senior members of the current administration have direct links to various (oil) companies and other corporations!

The opponent is off-balance ECONOMICALLY and only requires the smallest economically related nudge to effect defeat! Care to guess the method now? It should be easier this time your brain (sponge) is beginning to engage! DELAY AND STALL ALL SERVICING OF DEBT; it is important not to default but DELAY until action is threatened then only offer 70% or 80% of the required amount - the creditors are in no position to argue or foreclose en masse.

They created the problem so Delay and Stall, give them grief at every turn, the house of cards that George built will collapse in no time! Continue applying pressure in this way until you remove all criminals from government and bring the economy to a crisis that forces regulators to take action against those who destroyed the economic viability of the nation. I would remind you that the Russian, Chinese and other Asian and Latin economies have been booming while the U.S. economy has been going down the plughole.

DO NOT RELENT, CONTINUE UNTIL THE GUILTY ARE HELD ACCOUNTABLE FOR ALL THEIR CRIMES! It matters not whether you employ this strategy alone or in concert, the state of the economy is such that every effort has an impact!

In conclusion feel proud you are bringing the enemies of the state to JUSTICE; the Republic, as

envisioned by the founding fathers is SAFE only in the hands of the people!

Fuck Bush and his criminal government!

God bless the brave and the free.

We are One.
