

ANZAC legacy tarnished by today's ADF

international / peace/war / commentary

I hoped I would never be required to confront the reality of Australian military forces consciously engaging in criminal assassinations -- methods usually associated with Israel's IDF and the American mass murdering military. However, ABC journalists have recently uncovered the sordid activities of today's (Howard's and Rudd's) ADF. And what a tragic day it is for Australia and its once proud and honourable defence force.

Untainted AIF Rising Sun, 1969

We would have thought the Australian military had finally learnt from bitter experience the folly of allowing our troops to be led by foreign imperial powers. The Boer War saw Australian's, 'Breaker' Morant, executed by 'Lord' Kitchener for political purposes. WWI saw the ill-planned Dardanelle debacle and the ensuing Gallipoli landings, which resulted in the SACRIFICE of thousands of Aussie diggers. During WWII that drunken prick, Winston Churchill viewed our troops as a colonial resource but General Blamey began to assert our right of command and priority to defend our national interest rather than be utilised as expendable pawns by Imperial powers.

At the cost of thousands of Aussie lives a lesson WAS finally learnt - we thought! But nothing prepared the nation for the servile and cowardly leaderships of John Howard and Kevin Rudd. It is now a matter of historical record that both these 'Australian leaders' would rather serve Washington and engage in war crimes than uphold our hard-won independent and honourable fighting tradition!

The 'aluminium tubing;' PM, John Howard, is a war criminal pure and simple. He lied Australia into an illegal war at America's request -- the public domain contains a wealth of incriminating information in that regard. Rudd, however, missed that opportunity, though he stretches every sinew in his neck serving Washington and Murdoch today. We remind Rudd and the perverse command of today's ADF that it is the inalienable right of every nation and people to repel all invaders and occupiers from their traditional lands and Afghanistan is no exception to that universal rule/law!

Allowing our forces to adopt the criminal methodologies of Israel and America is the height of folly, as both these nations are reviled by the world.

America UNSUCCESSFULLY utilised assassination methods in Indo-China. The now infamous 'Phoenix Program' is one example of American murder squads assassinating hundreds of innocent Vietnamese on the flimsiest hearsay 'evidence!' Poor intelligence, a talent in which America excels, resulted in many innocents killed. The consequences of this perverse and misdirected assassination program were that droves of previously non-committed Vietnamese joined the communists and the foreign invader was finally routed. It should surprise no one that people tend to fight those who

invade their lands and indiscriminately murder innocent people.

The current PM, Kevin Rudd, continues in Howard's footsteps and acquiesces to the Pentagon's mindless 'tactics.' The ADF is now engaged in the highly questionable practice of summary murders or assassinations! The result of Rudd's misdirected allegiance is that Aussie troops are now guilty of murdering one Afghan local government official, interring numerous Afghan civilians in dog kennels and killing countless civilians the media is loath to report. Perhaps the ADF has also adopted the US military's habit of amphetamine abuse, which negatively affects judgement but increases the propensity to overreact to situations!

A very revealing report from the Pakistan Daily leaves no doubt as to the real purpose behind America's illegal murder campaigns. America views all intellectuals as enemies, as it is they who shape culture.
