

## Focus on the source of the problem

by nano *Sunday, Jan 18 2009, 1:33am*

international / peace/war / commentary

Sometimes I wonder whether I should extol the virtues of NOT drinking tap water - I haven't touched the stuff in decades. What is glaringly obvious to me seems mysterious or esoteric to others - get a grip! The CURE in Gaza and the Middle East in general, is to hold AMERICAN WAR CRIMINALS AND SUPPORTERS OF ISRAEL'S WARS (murder sprees) TO ACCOUNT! I am of course referring to the outgoing Bush administration, which has supported, militarily and politically, all recent conflicts in the Middle East! Israel wouldn't dare make an aggressive move in the region without American approval AND SUPPORT! Now take a good, long, cool drink of filtered water and wake up to yourselves.

America gives the political OK and then supplies whatever military hardware it deems necessary or Israel requests - made in the USA, in more ways than one! So, people, who or which nation is more culpable, Israel the proxy, or America the INSTIGATOR and SUPPLIER of the means?

Answer the above simple question and then open your eyes to REALITY, not the 'presentations,' fictions and DISTRACTIONS that spew from the mass media on a daily basis.

America is guilty of the most heinous war crimes committed this century; have we so soon forgotten one million dead, innocent men, women AND CHILDREN in IRAQ? That toll constitutes a holocaust by any definition of the term. If you would see a REAL END TO HOSTILITIES strike at the root not the leaves! Holding senior members of the Bush regime accountable automatically leads to accountability in Israel. The 'permanent war' doctrine of the neo-conservatives MUST be ERADICATED AT ITS SOURCE and the most efficient and effective means of accomplishing that aim is WAR CRIMES TRIALS -- wake up people!

If Obama is incapable or supports the poisonous status quo then simply exercise your Constitutional Right and throw the FRAUD out of office!

Stop your whinging and whining and focus on REAL SOLUTIONS! ISRAEL WOULDN'T DARE ENGAGE IN WAR WITHOUT EXPRESS PERMISSION AND SUPPORT FROM THE USA.

It was an American social philosopher that stated a good cut at the root of a problem is more effective than thousands of slashes at the 'leaves!'
