

Some of Cayce's Predictions

by ides - A.R.E. Thursday, Mar 19 2009, 6:55pm

international / environment / commentary

It has begun!

Recent events have warranted the upgrade of this comment -- originally to article 304 -- to story status. The principal considerations for the upgrade relate to relevancy and timeliness.

The sheer beauty and power of Nature's forces may have also influenced our decision; 'let her rip, Gaia -- way to go!'

Mt. Redoubt, previous eruption

Following are some of Edgar Cayce's earth changes predictions for the end of the millennium. Cayce claimed these earth changes, culminating in the shifting of the poles, would precede a new enlightened age for humankind -- the way we're going at the moment, anything would be an improvement!

*What a bunch of miserable failures we have all turned out to be; we allow war criminals, rogues and robber barons to wreak havoc with impunity while we retire to our home entertainment units and hope to God that we are not affected or have to get involved! Well, I've got some REAL NEWS, **'nobody gets out without paying the 'banker;'** and I'm not referring to the Wall St variety!*

But perhaps there is some hope yet; march on your Capital and demand the removal of puppet/criminal leaders -- scream, JUSTICE, until your are hoarse and do not relent until YOU/WE have removed the filth and corruption that infests the halls of OUR governments. Or pay the price for avoidance and inaction!

This short introduction was rhetorical, as I/we already know the outcome. Best of British, sheeple!

"When there is the first breaking up of some conditions in the South Pacific and the sinking or rising in the Mediterranean and the Etna area then we would say they have begun.

Los Angeles, San Francisco, most all of these will be among those that will be destroyed before New York even

If there is the greater activities in the Vesuvius, or Pelee then the southern coast of California and the areas between Salt lake and the southern portions of Nevada may expect within the three months following same, an inundation by the earthquakes.

Many portions of the east coast (America) will be disturbed, as well as many portions of the west coast., as well as the central portion of the United States.

Lands will appear in the Atlantic as well as the Pacific. What is the coastline now of many a land will be the bed of ocean. Many of the battlefields of the present (1941) will be ocean.

Portions of the now east coast of New York, or New York City itself, will in the main disappear. This will be another generation, while the southern portions of Carolina, Georgia, these will disappear. This will be much sooner.

The waters of the Great Lakes will empty into the Gulf of Mexico. It would be well if a waterway would be prepared.

Virginia Beach will be among the safety lands as will be portions of what is now Ohio, Indiana and Illinois and much of the southern portion of Canada, and the eastern portion of Canada; while the western land, much of that is to be disturbed as of course much in other lands.

The earth will be broken up in many places. The early part will see a change in the physical aspect of the West Coast of America. There will be open waters appear in the northern portions of Greenland.

There will be new lands seen off the Caribbean Sea, and dry land will appear. South America will be shaken from the uppermost portion to the end, and in the Antarctic off Tierra Del Fuego, land and a strait with rushing water.

As to changes physical again: the earth will be broken up in the western portion of America.

The greater part of Japan must go into the sea.

The upper portion of Europe will be changed as in the twinkling of an eye. Land will appear off the East Coast of America.

There will be upheavals in the Arctic and in the Antarctic that will make for the eruption of volcanoes in the torrid areas, and there will then be the shifting of the poles so that where there have been those of a frigid or semi-tropical will become the more tropical, and moss and fern will grow."
