

America vs America and its losing!

by doc *Wednesday, Apr 15 2009, 11:55pm*

international / social/political / opinion/analysis

The first signs of social incompetence are living in your own private 'USA' and failing to connect to the world around you; for nations that condition is fatal!

America, the world's leading TERRORIST nation -- by any definition of the word -- is withdrawing/contracting into its own private 'Idaho!' If we compare Saddam's Hussein's murderous tally of INNOCENT VICTIMS, overestimated at 400,000, to America's since Vietnam; 6 million, 1 million in Iraq alone (and COUNTING) the ugly TRUTH becomes plain for everyone to see!

Faced with the revolting truth of itself, America, rather than REFORM and RESTORE its once proud heritage, plunges further into pathological DENIAL and HYPOCRITICAL behaviour -- the condition has now taken on what medicos call a 'syndrome.' Yes indeed, if you harboured any doubts regarding the health of the nation then doubt no more, the nation is SICK and its future is GRIM; notwithstanding that RADICAL remedial surgery would cure the situation; however, the lack of that action is also symptomatic of the DISEASE -- tragic!

All infections affect the surrounding tissue so it's not surprising that other nations show symptoms of stupor regarding the 'star-spangled' DISEASE. Nevertheless, Asia/Russia and the greater EAST have made full recoveries, even slow to heal crotchety Europe is on the mend -- the world will soon be glad to rid itself of this ravaging disease -- to think the illness could have been avoided had the world's immunising safeguards (International Law and Convention) been maintained/applied; a lesson learnt!

Yesiree Bob, what the world NOW sees is the REAL portrait of 'Dorian America;' a vile, FAILED nation with a paltry 300 million population living in a dream world of LIES and suffering the effects of a biblical bedbug plague, how appropriate!

The default currency infection remains the last insidious aspect of the disease but it's not terminal providing RADICAL SURGERY is undertaken. Once the carrier is excised the progress of the disease is halted and easily eradicated.

Never forget the warning signs of this DISEASE lest you contract it again; its symptoms are 'invasion, plunder wanton murder, lies, hypocrisy and denial' -- you could hardly mistake it for a common cold!

The world is applying the cure and vaccinating others as I write but never forget, you do not reason with a malevolent virus, you ERADICATE it with radical treatment!

Yes, it's good to see things on the mend again.

Stay healthy and prosper.
