

Bilderberg Group Orders “Total” Destruction Of US Dollar

by Sorcha Faal via talya - WhatDoesitMean *Friday, May 22 2009, 9:52pm*

international / social/political / other press

A new Kremlin report on the shadowy [Bilderberg Group](#), who this past week held their [annual meeting](#) in Greece, states that the West’s financial, political and corporate elite emerged from their conclave after coming to an agreement that in order to continue their drive towards a [New World Order](#) dominated by the Western Powers, the US Dollar has to be “totally” destroyed.

Even worse, a new US report on these secret Bilderberg meetings states: *[“Investigative journalist Daniel Estulin, whose information from inside Bilderberg has routinely proven accurate, states that the global elite’s plan to completely destroy the economy and ultimately lower global population by two thirds has stoked fears even within Bilderberg itself that the fallout from such chaos could ultimately result in the globalists losing their control over the world.”](#)*

Prior to the Bilderberg Meeting, the Kremlin report continues, most of the West’s wealthiest elite convened at an [unprecedented](#) secret meeting in New York called for and led by the staunch New World Orderist David Rockefeller to plot the demise of the US Dollar and which, strangely, was reported in the US mainstream propaganda media, but to which the dissident American website PrisonPlanet.Com questioned by stating:

[“ABC News today devoted a prominently featured three page story to a “secret meeting” of rich philanthropists which took place earlier this month in New York, and yet one of the biggest news corporations in America was completely silent during a far more important meeting of around 150 of the world’s powerbrokers at the Bilderberg conference last week.”](#)

To the ‘ultimate’ outcome of the plans of the West’s elite classes, connived under the auspicious of the [Nazi backed](#) Bilderberg Group, Russian Intelligence Analysts predict that their fears of “losing control” due to the catastrophic chaos they are embroiling our World in are, indeed, valid, especially since the unleashing upon our Earth’s population the [bioengineered](#) H1N1 Swine Flu variant that is continuing its unrelenting march of death and illness across our entire Earth, and when coupled with the total collapse of the Global economic system can only lead to Total War.

Russian President Medvedev has joined calls by [China, Brazil](#), and other Nations, to prepare for the collapse of the US Dollar and has [put forth](#) the Russian Ruble as one of a number of International Reserve Currencies to replace the soon to collapse American currency, and as warned about by the St. Petersburg Times News Service:

[“Last week, despite the apparent appeal of the dollar in the midst of this global crisis, the U.S. bond market — often a harbinger of future trends — suddenly panicked, and the prices of U.S. Treasury bonds plummeted with 10-year yields jumping to over 3.3 percent. This could be ominous for the future of the dollar.”](#)

Even worse for these American people is how horrific their immediate economic future is going to be, and as best articulated by Gary Dorsch, the editor of Global Money Trends, who writes: *[“No one is asking who will purchase the \\$1-trillion of US Treasuries to be offered to the market by](#)*

[September. Once that colossal amount of paper is bought, who will purchase another \\$5-trillion of Treasury paper over the next four-years, as the US-government plunges deeper into insolvency. The Federal Reserve would be forced to print \(monetize\) vast quantities of US-dollars to pay the principal and interest on the national debt that is not covered by tax revenue.](#)

Bloomberg News Service is further reporting today that the concerns of the US Federal Reserve Bank are also growing, and as we can read, ["Policy makers, meeting April 28-29 in Washington, saw "significant downside risks" to the outlook for the economy, with the global financial system still "vulnerable to further shocks," minutes of the session released yesterday said."](#)

With the US now reporting [another record](#) being set in the number of their citizens out of work and claiming unemployment benefits, the true number of American jobless has reached a [staggering 15.8%](#) of their workforce with no relief in sight and many Russian analysts predicting a summer of violence due to massive discord among these beleaguered people as once their relief payments run out there exists no more money to pay them.

It is important to note that Great Britain is preceding the US into bankruptcy and is reported [close to losing](#) its AAA Credit Rating as it suffers its worst economic crisis since World War II, with the Financial Post issuing a further warning to the Americans, and as we can read:

["The U.S. dollar's day of reckoning may be inching closer as its status as a safe-haven currency fades with every uptick in stocks and commodities and its potential risks - debt and inflation - are brought under a harsher spotlight. Ashraf Laidi, chief market strategist at CMC Markets, said Wednesday a "serious case of dollar damage" was underway. "We long warned about the day of reckoning for the dollar emerging at the next economic recovery," Mr. Laidi said in a note."](#)

After the deliberate collapsing of the US Dollar, these reports continue, the Bilderberg 'plan' for the Global economy rests on what are called [Special Drawing Rights](#) issued by the Western controlled International Monetary Fund, and which the Telegraph News Service succinctly warns:

["The International Monetary Fund is poised to embark on what analysts have described as "global quantitative easing" by printing billions of dollars worth of a global "super-currency" in an unprecedented new effort to address the economic crisis."](#)

Russian economists warn that this IMF attempt to destroy the value of Eastern European, Asian and Middle Eastern economies is 'doomed to failure', and now being reported that oil rich Saudi Arabia has now joined Russia, China and Brazil by [refusing](#) to lend to this travesty of a bank backed by the West and intent upon massive destruction to obtain their goals.

The American people continue to remain, for the most part, blissfully unaware of catastrophe looming before them and continue to believe the litany of [Orwellian lies](#) being poured upon them by their propaganda media organs, never once raising any objection to trillions of dollars that have been stolen from them and which continues to flow the pockets of their political and corporate overlords intent upon destroying, forever, their once great Nation and which the US Federal Reserve Inspector General Elizabeth Coleman stated brazenly before the US Congress that she has "[no idea](#)" where \$9 Trillion of US taxpayer has gone, or who got it.

But, to the worst actions being done by these witless Americans is their continuing to pay into their bankrupt banks their hard-earned monies which within the next year will cease to have any value whatsoever instead of using what little time they have left to prepare for the many catastrophes to come. And, what makes this especially appalling is that these Americans are continuing to pay their debts so that they can remain good credit risks, while at the same time their banks are bankrupt,

their government broke and their way of life changed forever.

One wonders if these people have truly lost the instinct to survive or, before all is said and done, they will explode with righteous anger over the destruction of their homes, families and Nation as a whole.

The historical framework of these events shows but two possibilities, the Nazi Germans who continued following their doomed leaders to the utter destruction of their homeland, or the Russian people who rose in mass to throw off the manacle's of communism after decades of slavery....one can only hope these people choose wisely, and fast, before all is lost.
