

Internet manageability: a LOST cause!

by Kismo Sunday, Aug 16 2009, 11:14pm

international / peace/war / commentary

I would state at the outset that elite hackers roam the 'wire' at WILL, as they have been doing since leaving drone regulators, policing agencies AND Internet 'security' companies in the proverbial shade -- never have so few had so much influence over so many (see link). In fact, as is clearly stated in a previous article, it is now possible for an elite group of 'Uber' hackers to take down a State via, of course, the same stealth, asymmetric strategies that are characteristic of all elite groups and solo (Uber) operators; careful targeting, surprise and concentrated/coordinated force delivered secretly/anonymously from myriad invisible 'locations!'

Hacker elites necessarily know each other only as 'digital shadows' – digital 'ninja' would be an apt description! Highly skilled and disciplined THERE IS NO STOPPING elite hackers simply because 'drones' do not have the means or wherewithal to mount an effective challenge; I quote from a paper published two years past but refers to a period years prior to that:

"New Uber warfare strategies of the 21st century have relegated conventional war and to a lesser extent guerrilla war strategies to history. Today's ubiquitous and highly accessible computer technologies have redefined warfare. Traditional militaries are facing redundancy, irrelevance and heightened vulnerability to skilled digital operators.

The keyboard is proving to be the most effective weapon of the modern age!

Uber war is asymmetry taken to its final phase. In theory a single individual is now capable of subverting a State!

The digital age has resulted in a universal dependence on digital technology. The most powerful military powers are now exposed to (persistent) direct and indirect digital attacks – it is only a matter of time before a skilled digital warrior succeeds in compromising the defence capability of a superpower." [Emphasis added.]

The operational and skill gap between drone 'what day is it' police regulators and bleeding edge Uber hackers is so wide that it can NEVER be spanned. This 'gap' also creates widely diverging values and conflicting ideologies – all things sacred to 'drone/slave' society are arse-wipe to hackers, ESPECIALLY MONEY and 'coloured-rag' patriotism.

Due to its deficiencies in digital warfare, the USAF recently OPENLY advertised for hackers (LOL) not realising that only 4th and 5th rate hackers would work for ANY government. Moron governments should surely be aware by now that hackers are in the habit of pitting governments

and corporations against each other; perhaps an elite warrior may have decided to gain some inside knowledge, who knows?

Elite hackers have long been aware that criminals have hijacked democratic States and placed puppets in power to serve their interests, America is clearly the most flagrant example! So a state of war, involving stateless groups and criminal nations has existed for some years now.

The outcome of this conflict is assured; take a 'wild' guess, sheeple, are a bunch of avaricious, mass murdering, geriatric pigs able to even understand what confronts them let alone contend/defend? Indeed the understanding of these brutish, psychopathic, geriatric criminals limits their options to FILTERING (Rupert Conroy) or 'turning it (internet) off!' The last option made public knowledge by Jay Rockefeller alarmed the Chinese, Russians and Europeans to such extent they immediately deployed countermeasures and made provision for America pulling the plug on its DNS servers! Not even 'throwing the switch' is a REAL option for the retarded, one foot in the grave, geriatric PIGS in real power! [Do not forget there's a light pole with your name on it, you murdering bastards!]

All filtering technologies are EASILY circumvented and local 'DNS' servers take over from US controlled servers - so its think again, you dumb, murdering, retarded fuck's!

I could go on but I'm getting heated - I would end this paper now with YOU'RE 'DEAD' ALREADY, doodles! ['Misplaced' a few hundred billion lately? Unless you convert to 'gold' and carry/stash it, YOUR worthless money is OURS!]

Have a nice day!

[Greetz to 'ferrite,' 'Uber 01' and all the crewz - We are ONE!]
