

The world's leading civilian killing nation, AMERICA, admits DEFEAT in South Asia!

by gan *Wednesday, Jan 27 2010, 8:40am*

international / peace/war / commentary

Afghanistan promises to be the first of a series of defeats in store for mass murdering, criminal, BROKEN, America. Regardless of the badly camouflaged, face-saving talk of "re-integration," 'power sharing,' with avowed enemies the Taliban, REALITY dictates America has been squarely DEFEATED!

Taliban fighters

The Taliban, as every informed analyst and commentator is aware, will settle for nothing less than the COMPLETE WITHDRAWAL of all foreign invaders and occupiers from Afghan soil; unlike vacuum-headed Americans, Afghans have very long memories.

Hearken back to the uncompromising bellicose words of that Texan imbecile George W Bush and his controller Cheney and you will get a sense of the proportions of this HUGE defeat. Appreciate that the world's most powerful military was defeated by a bunch of poorly equipped, untrained, DEDICATED FREEDOM FIGHTERS and it will become clear that Afghanistan is but the beginning of the End of American hegemony!

As previously stated (numerous times on this site) all wars are won by the superior warrior not 'super weapons' and technologies that the Hitlers of this world IMAGINE deliver victory! Semi-robotic, civilian killing UAVs and other mindless technologies that American fascists believed would deliver victory have CLEARLY contributed to the resistance and the final defeat of foreign occupiers!

We take particular delight in anticipating the awkward rhetoric of SERVILE Oz politicians, especially Rudd who only recently emphasised that HE would be there [Afghanistan] for the "long haul" – that pathetic little lackey omitted to mention he does what he's told by foreign powers – makes you proud to be a cringing, parochial, racist, servile Aussie, doesn't it? Fortunately most Aussies are able to make their own decisions regarding their future. Rudd must now deal with Murdoch's regressive, information CENSORSHIP policy, which he has been ordered to implement regardless of local IT industry opposition and MASSIVE public opposition!
