

## **Preludes to Dynamic Social Change**

by lynx *Sunday, Feb 7 2010, 7:55pm*

international / social/political / opinion/analysis

Yawning chasms of DISPARITY and INEQUITY have preceded every social r/evolution in history; are we blind to the signs in the sky today? NO! However, the (let them eat cake) arrogant attitude of self-styled elites blinds them to the consequences of their criminal, corrupt actions. Take for example, Financiers, Bankers and Corporate CEOs; they insider trade, exploit, LIE and CHEAT, O-P-E-N-L-Y displaying the UTMOST CONTEMPT for the masses, LAW and GOVERNMENT, then rub the noses of the public and our once functional regulatory social institutions in their excrement! What would you suppose are the consequences of these appalling actions; history bulges with information?

Self-styled elites brazenly rob and steal from hard working people then destroy entire economies. Rather than face legal consequences for their clearly criminal incompetence they UNITE, form a criminal front and proceed to BLACKMAIL governments to bail them out AT OUR EXPENSE! In a show of delusional invulnerability, they add a blood-red cheery to the 'cake' of their criminally CORRUPT endeavours! I hope YOU didn't miss the spectacle of Banksters showering themselves in UNDESERVED bonuses -- millions in taxpayer money -- while exploited and abused citizens eat shit!

These, insular 'let them eat cake' elites arrogantly celebrate their COMPLETE CONTROL over failed democratic governments DAILY - how much longer before violent retaliation? IT IS NO LONGER A MATTER OF IF, JUST WHEN!

Have a nice day, Mr Alan '\$135m' Moss! Only a match is required in the current environment that you and your cohorts created! You fail to realise that violent social change is created by the exact same forces and circumstances that triggered it countless times in the past; isn't that right Mr. Malcolm 'G Sachs' Turnbull? It's enough to give you the willies.

See you soon! [If I don't someone else will, be assured!]

**"When the Dollar Crashes"**
