[Greetz to ALL the keyboard warriors and kiddies alike - We are ONE (we shouldn't forget most of us started as kiddies!)]

The hacker group Anonymous, after a previous failed, but big hearted, attempt finally downed Oz government web sites with Distributed Denial of Service (DDoS) attacks - got there in the end dudes! But don't forget to give credit where it's due, to an early pioneer hacker and warrior, the man who developed the principles/STRATEGY, code and early tools to implement Denial of Service attacks, it was his brain and skill that downed Yahoo in the early days - no one thought it could be done, another barrier overcome - there are no limits to the skill and creative minds of elite hackers! So I take this opportunity to give credit where it's due, to the man himself, 'mixter' - well done, you old cunt; we couldn't have done it without you!

In the tradition of digital FREEDOM, LIBERTY and REAL DEMOCRACY, 'ferrite' has risen from the ranks to give us the stealth Uber attack, they cannot fight what they cannot see or detect -- roflmfao!

We roam freely in their banking systems, satellites and other critical systems, so if u imagine you can wage war on us, think again, arseholes!

You fifth rate morons haven't got a clue or hope - think on that when your weapons systems fail or somehow veer off course! Satellite 'guidance' - LOL! We wouldn't want our missiles/weapons failing us, would we? Target coordinates in error AGAIN - too fucken easy, you feeble fleas?

We have owned the wire for over a decade, we inhabit 'your' spaces and will launch our major coordinated offensive at the most critical time only - when u attempt to wage major (or nuclear) war, only then will you be able to see, but too late - goodbye, arseholes!

Btw -- Anonymous, watch out, the Oz Cyber Security Defence team r after ya - I bet that's got u worried - ROFL! How many elite hackers work for governments? Answer: NONE! Even the USAAF was forced to openly advertise for talent, lame fucks!

To all the cruz -- We are ONE - no leaders, no followers, speed, skill, anonymity and mutual cooperation ALWAYS win the day!

And to 'ferrite,' we owe u big time, man -- no better hacker in the world today - verified daily!

We own the 'machine'. Asymmetry is a keyboard!
