

Big Pharma and Psychiatrists are enslaving/killing you!

by clare *Friday, Apr 16 2010, 9:21pm*

international / health related / opinion/analysis

There are numerous causes/reasons for society's general apathy in the face of unprecedented OVERT criminality from the State. Hardly a murmur from a tranquilised public (40 million medicated in America alone) that views ongoing human rights violations daily and the brazen flouting of Laws which have protected civilised society for decades. As is clearly evident today, nations, particularly the USA, OPENLY engage in mass murder/HOLOCAUSTS and the most HEINOUS CRIMINAL ACTIVITY without any effective reaction from an almost completely PACIFIED PUBLIC, how so?

A major contributing factor to endemic social complacency is the widespread use of pharmaceutical/psychotropic and other legal 'medications' (drugs) in the USA and other western nations. The routine use of legal drugs has even permeated the military, where amphetamines ('combat enhancers') are administered to personnel -- with or without consent. As a result of this type of drug abuse the 'burnout' rate in the military today has skyrocketed; amphetamine induced psychosis is a primary factor in the escalating breakdown rate. However, the military are at pains to maintain the utmost secrecy of their abusive use of amphetamines and other DANGEROUS DRUGS for fear of legal and other repercussions.

The following videos detail a conscious strategy by Big Pharma to CREATE a MARKET for their psychotropic products by diagnosing common reactions to certain events as illnesses. The movie-length documentary from which these two videos are derived is highly recommended. The information contained in these presentations is presented clearly and without a hint of sensationalism. Viewing these videos is a very sobering experience indeed.

*[I would add our community organisations have assisted hundreds of people 'withdraw' from a clearly sick society in favour of a healthy, loving and MEANINGFUL lifestyle - one of our most effective healing methods is the simple and natural loving hug. **Human, not chemical support, is the most effective treatment for the troubled mind** - 'amazing isn't it?'*

We are ONE.]

Marketing Madness
