international / miscellaneous / news report

The global economic collapse of 2010 is right on schedule -- anyone that has any amount of hard earned money in this totally unstable casino environment is WARNED for the last time get out of the market or risk catastrophic losses. I can't make it any clearer.

Europe is broke and the U.S. national debt exceeds \$12 trillion -- China, Russia and a number Gulf States failed to dump the dollar, which will soon be worthless, their loss.

Withdraw and invest in anything REAL -- the market is G-O-N-E!
