

The Values of the People that control our Politicians

by drex Sunday, Jun 27 2010, 7:35am

international / environment / commentary

From the Niger Delta to the off-shore Oil rig explosion in Western Australia, then to the most catastrophic act of vandalism and environmental destruction in history, the Gulf of Mexico failure of the US government to REGULATE the polluting and murdering CORPORATISTS - what's a few million dead civilians in Oil rich Iraq and a DEAD ecology in the Gulf compared to the avarice of the bottom liners?

If the REAL Truth of the destruction of the gushing Gulf spill were known, the entire US puppet government and every Oil company executive would be hanged from the nearest vantage - corrupt criminal Banksters included.

The breeding ground marsh and grass lands ARE DEAD/dying that means the next generation of a myriad species of marine life upon which the region built a sustainable economy for generations has been killed and so ends the ecology of the region!

The following video depicts more of the same attitude from corporatist criminals HELL BENT on short term profit/LUXURY for themselves at ANY COST to innocent people and the planet! It is time to learn a new slogan, ***'the only good executive is a DEAD executive!'*** Or would you rather more civilian holocausts and a dead planet?

The criminal pigs that have hijacked our democracies and control our politicians are KNOWN TO US - to everything there is a season including HANGING criminal corporatists, EXECUTIVES and their criminally complicit puppet politicians!
