

UN Credibility in Tatters for not declaring No-Fly-Zone over Pakistan and Afghanistan

Full fly zone declared when America is doing the civilian killing

The UN stands totally condemned by declaring a no-fly-zone over Libya and NOT over Pakistan and Afghanistan where America does all the civilian killing by air.

From the puppet Hague Courts to the propoganda media in the USA and now the completely BIASED and fully exposed partisanship of the UN, the world views the brazen Double Standard pursued by America and its puppet allies.

The only other comparison that could be made to this flagrant injustice is the propoganda of the former Soviet Union, which presented contorted and linear views of reality to a cynical and sceptical population. 'Good job,' Amerika! But your only kidding yourself.

Very few swallowed the 'news' in the former USSR and even fewer are wearing the crap that issues from the Western media today. But don't tell the ruling Corporatist elites; they continue to labour under the delusion that they are still in control.
