

The Carbon Tax Ruse

by ash Monday, Mar 28 2011, 10:17am

international / environment / commentary

It's about swaps or derivatives not climate

A little research goes a long way, especially when dealing with a Goldman Sachs designed ETS con.

Iceland Eruption

Discover for yourselves how much Carbon just one recent volcanic eruption in Iceland released into the atmosphere and then realise what an outrageous con Goldman Sachs' plan for a derivatives (carbon swaps) trading scheme is. The ETS Banker designed strategy is about penalising the masses while creating massive wealth for the privileged few -- why am I not surprised?

And as always, it is the people that bear the brunt of the penalty/cost while minority banker elites continue to profit and rob us blind.

Surely we have had enough disparity and injustice over the past decade to last a thousand years -- but NOW Corporates and bought political puppets, like Australia's Prime Minister, Julia Gillard, would have us all believe that the ETS (Carbon Tax) is for our benefit -- WHOSE BENEFIT, Ms Gillard? Careful how you answer, as your neck may be stretched along with your criminal Banker masters when the time comes.

What an outrageous confidence trick the BANKS, Wall St and puppet politicians are attempting to play on the masses -- REJECT the Carbon Tax con for the SHAM that it REALLY is!

And don't forget to VOTE Independent in every election -- REPRESENTATIVE DEMOCRACY is RESTORED thereby.

Peace.
