Reality bites

The Libyan 'no-fly zone' established by America and its puppet allies via UN resolution 1973, by real definition, amounts to this: "No-Fly" actually means the US and NATO do ALL the FLYING and conduct air strikes unhampered by pesky nations defending their sovereignty!

How dare anyone resist the Imperial ambitions of the Corporations and the Pentagon, which is armed and owned by the Corporations.

'Humanitarian intervention' = Oil and gas acquisition. Learn dummies!

The first casualty of war, is LANGUAGE.

Today American hypocrisy and double standards have turned meaning inside-out and upside-down -- can you blame an under-educated public for not knowing the meaning of democracy, MAJORITY (not minority) rule?

Obama is assured his second term, simply more linguistic convolutions are required to push the population to the edge of reason and mental stability.

The cost of all these semiotic and semantic antics is of course social disintegration -- but that outcome wasn't factored into the short term ambitions of the Corporations.

The clear choice for American citizens is to boycott the major parties and vote for representative INDEPENDENTS at all times in all elections. Ignore the two party CIRCUS and mindless fanfare; vote with your brain not with media presentations -- the greedy elites are routed thereby!

The local Media ensures that most Americans are lost to Reality
